DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/22/2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kleinert (USPN 4,436,215).

4. With respect to claim 1, Kleinert shows a base (11) opposing side walls (14&15) extending upwardly from and substantially perpendicular to said base, each of the side walls including a plurality of receiving slots (21) spaced along the length of the side walls, and at least one partition (22) receivable within the receiving slots on each of the opposing side walls and selectively positionable between the side walls along the length of the side walls to adjust an interior length of the container, the partition being perpendicular to said side walls and fitting securely against said sidewalls, the partition

Art Unit: 3781

having projections (25) located at or near the periphery of a set of opposing edges of said partition, wherein when the partition is positioned selectively between the side walls the projections are positioned adjacent the side walls to reduce an interior width of said container.

5. With respect to claim 2, Kleinert shows opposing end walls (12,13) extending upwardly from and substantially perpendicular to said base.

6. With respect to claim 7, Kleinert shows the capacity of said container is at least 50 coverslips (fig. 1).

7. With respect to claim 8, Kleinert shows the capacity of said container is at least 500 coverslips (fig. 1).

8. With respect to claim 9, Kleinert shows a substantially flat plate with projections located at or near the periphery of a set of opposing edges of said partition (fig. 2), wherein said partition is placed within a container for holding coverslips, and wherein said projections serve to adjust the interior width of said container (fig. 4).

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims s 10 & 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kleinert (USPN 4,436,215).

Kleinert discloses the claimed invention except for the thickness of each of said projections is approximately 1 mm, or the thickness of each of said projections is approximately 2 mm. It would have been an obvious matter of design choice to have the thickness of each of said projections is approximately 1 mm, or the thickness of each of said projections is approximately 2 mm, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

Response to Arguments

10. Applicant's arguments with respect to claim 1,2,7-11 have been considered but are moot in view of the new ground(s) of rejection.
